PERMIT NUMBER: ACT/007/039

DATE OF INSPECTION: 4/7/99

(Comments are Numbered to Correspond with Topics Listed Above)

1. PERMIT-

The permittee will be submitting three amendments to the Division in the near future. All three amendments deal with hydrology. The amendments are (a) additional riprap to sediment pond and embankments (request of State Water Rights), (b) installation and designs for drop drains and swells to sediment pond, and (c) two culverts and future parking lot site.

2. SIGNS AND MARKERS -

Identification signs meet the requirements of the R645 Coal Rules. The perimeter markers were spot-checked and are located around the perimeter of the disturbed areas.

4A. DIVERSIONS -

Several diversions have been installed and convey disturbed area drainage into the sediment pond. The permittee has also installed several undisturbed culverts which convey water to the creek.

4B. SEDIMENT PONDS -

The sediment pond is nearly 90 percent completed at the time of the inspection. The sediment pond does contain a considerable amount of water, but it is not likely to discharge in the spring. No hazardous conditions were noticed during the inspection.

The permittee will be submitting an amendment to add riprap to the inlet to the pond and riprap against the outer bank on the discharge side. There will also be a change to the diversion entering the pond.

7. REFUSE -

There was no refuse being stacked or stored at Dugout mine.

8. NON-COAL WASTE -

The area was clear of non-coal waste material.

18. SUPPORT FACILITIES -

The permittee is in the process of installing the coal handling facilities.

Note: This inspection report does not constitute an affidavit of compliance with the regulatory program of the Division of Oil, Gas, and Mining.
